

[シンポジウム] 5月27日 13:30 - 16:30 GOSAT 温室効果ガス 観測技術衛星

所: 東京国際フォーラム 主催: JAXA 後援: 文科省 / 環境省 / (独)国立環境研

プログラム				
13:30~13:40	開会の挨拶			
13:40~14:00	GOSATとは			
	安岡 善文 (東京大学教授 GOSATチーフサイエンティスト)			
14:00~14:20	GOSATプロジェクトについて			
	浜崎 敬 (JAXA GOSATプロジェクトマネージャ)			
14:20~14:30	NASA Earth Science Observations from Space			
	P. DeCola (NASA Headquarters)			
14:30~15:00	The Orbiting Carbon Observatory (OCO) Mission			
	C. Miller (NASA Jet Propulsion Laboratory)			
15:00~15:20	休憩			
15:20~16:00	“環業革命”とGOSATへの期待			
	山根 一真 (ノンフィクション作家)			
16:00~16:20	地上での温室効果ガス観測			
	井上 元 (国立環境研究所 総括研究管理官)			
16:20~16:30	閉会の挨拶			
	懇親会 (会費制)

**日米防衛協力、3分野で…来月にも共同文書**

日米両政府は16日、在日米軍再編協議に関連し、自衛隊と米軍の新たな役割分担を明記した共同文書を6月にも策定、公表する方向で調整に入った。

〈1〉国の防衛〈2〉新たな脅威への対応〈3〉国際安全保障環境の改善——の3分野での具体的な日米防衛協力を定める。日本周辺有事における民間空港・港湾の米軍の優先使用や自衛隊の対米後方支援、国際テロや弾道ミサイルへの共同対処、大量破壊兵器拡散阻止構想(PSI)での連携強化などを盛り込み、「日米防衛協力の指針」(ガイドライン)の見直しに反映させる方針。

共同文書には、日米が大筋で合意した在日米軍基地の具体的な配置見直し案の一部も盛り込む方向で検討している。その後、関係自治体との調整を進め、年内に最終的な基地見直し計画を決定したい考え。

1997年に策定された現在の防衛協力指針は、〈1〉平素から行う協力〈2〉日本有事における対処行動〈3〉周辺有事の協力——の3分野協力を定めている。今回は、「国の防衛」に現指針の〈2〉と〈3〉を含め、有事関連法や周辺事態法の制定で可能になった米軍の民間

空港・港湾の優先使用や、自衛隊による燃料・食料の提供・輸送、基地警備などの後方支援を明記する。一連の後方支援により在日米軍任務の一部を肩代わりし、米軍基地削減につなげる狙いがある。

「新たな脅威への対応」では、ミサイル防衛(MD)での情報共有、共同研究の加速や、国際テロ・ゲリラ攻撃を防ぐための情報交換などが浮上している。

「国際安全保障環境の改善」では、自衛隊がイラクなどで行ってきた国際協力活動実績を評価し、こうした分野で日米協力を強化する方針を打出す。インドネシア・スマトラ島沖地震・津波のような大規模災害の救援活動のための現地調査を日米共同で行うことなども盛り込む。

両国は、6月4、5の両日にシンガポールで開かれる「アジア安全保障会議」(英国国際戦略問題研究所主催)の際に大野防衛長官とラムズフェルド米国防長官が会談する方向で調整している。その前後にラムズフェルド長官が日本に立寄り、外務・防衛担当閣僚級の「日米安保協議委員会」(2プラス2)開催も検討しており、こうした際に共同文書を発表する考え。

### 国防省は33の米国軍事基地の閉鎖を提案

#### Pentagon proposes closing 33 large U.S. military bases

The Pentagon has proposed closing 33 of the 318 military bases in the U.S. It would also add 400 employees at 49 other bases. Officials say the move would "align base structure with the force structure that is expected to be needed over the next 20 years." Closing the bases

would cost \$24.4 billion, but would save \$5.5 billion annually. The plan still needs approval by an independent panel and the president. Also, Congress could prevent the closings by voting down the entire list of bases. Engineering News-Record (5/13)

### 衛星の打上げ運用が2つのフロリダ州の軍事基地を救う

#### Satellite launching operations save two Florida military bases

Two Florida military bases will remain open because of their role in launching military satellites, Florida Today reports. The Pentagon last week announced it would close 33 large bases. Patrick Air Force Base

and Cape Canaveral Air Force Station are not on the list of bases to be closed. The bases' satellite-launching abilities will be needed for many years, military experts say. Florida Today (Melbourne) (5/15)

### 実現の可能性出てきた宇宙エレベータ

宇宙空間にペイロードを上げる実用的な方法は、これまで化学ロケットしかなかった。しかし化学ロケットの場合、打ち上げられる質量のほとんどはペイロードではなく、燃料と酸化剤である。より効率的な宇宙輸送システムとして考案されたものの一つが「宇宙エレベータ」である。遠心力と引力がバランスしたケーブルで地上と宇宙空間をつなぎ、このケーブルを使ってペイロードを輸送する。これまでは、ケーブル材料の比重と強度の関係から実現不可能と考えられていたが、ケーブルにカーボンナノチューブを使用することで実現可能性が高まって

[http://www.nistep.go.jp/achiev/ftx/jpn/stfc/stt049j/0504\\_02\\_topics/200504\\_topics.html#0504fron](http://www.nistep.go.jp/achiev/ftx/jpn/stfc/stt049j/0504_02_topics/200504_topics.html#0504fron)

きた。

本年3月、NASAが宇宙エレベータのキーとなる技術について、懸賞プログラムを開始した。契約の手間やコストをかけずに、民間から斬新なアイデアが得られる可能性がある。また本年10月に福岡市で開催される第56回国際宇宙会議においても、宇宙エレベータに関するレクチャーが一般公開される予定である。急速に開発が進んでいる技術テーマとして注目される。

2005年5月17日 「人民網日本語版」 更新時間 :2005年05月17日 16:11 (北京時間)

### インターネット著作権の保護規定、まもなく施行へ

[http://j.peopledaily.com.cn/2005/05/17/jp20050517\\_50085.html](http://j.peopledaily.com.cn/2005/05/17/jp20050517_50085.html)

国家版權局と情報産業部が先月30日に共同で公布した規定「インターネット(=＜イ＞)著作権行政保護弁法」が30日から施行される。

中国には現在、基幹ネットワーク運営企業が10社あり、うち営利企業は6社、非営利企業は4社。＜イ＞接続サービス事業者(ISP)は800社、コンテンツ・プロバイダ(=C/P)は1万社を数え、＜イ＞利用者は1億人を超える。現行の「著作権法」では＜イ＞情報サービス提供者の法的責任に関する条件規定が不明瞭で、行政による法執行(エンフォースメント)の必要性に効果的に対応するのが難しいことから、「＜イ＞著作権行政保護弁法」を制定する必要が出てきた。

「＜イ＞著作権行政保護弁法」が行政保護規定の範囲とする対象は、＜イ＞情報サービス事業のうち、C/Pが＜イ＞操作によって自動的に提供できる、コンテンツのアップロード、保存、リンク、検索などのサービスで、かつ、配信するコンテンツに対していかなる編集、修正、選択

なども行わない場合。コンテンツには音響映像製品などの作品が含まれる。＜イ＞コンテンツを直接提供する行為に対しては、「著作権法」を適用する。つまり、新規定のターゲットは主に情報サービス事業者で、ネット利用者ではない。

新規定は著作権に関して情報サービス事業者が負うべき行政上の法的責任を明確にしている。情報サービス事業者に対しては、C/Pの提供するコンテンツをすべて審査する義務を負わせるのは難しいため、＜イ＞上の著作権侵害行為については、過度の法的責任を追及しない立場が取られている。ただし、C/Pによる著作権侵害を認識していたり、著作権所有者からの通報を受けても削除措置を取らなかったりしたケースについては、公共の利益が損なわれた場合、＜イ＞情報サービス事業者が行政上の法的責任を問われる。(編集KS)

## **Featured Company**

### **Honeywell International - SSEC - Aerospace Electronic Systems**

Honeywell International is a leading supplier of specialized integrated circuits for electronic computer systems in military satellites, strategic missiles and other space borne system applications. Radiation hardened/tolerant Silicon On Insulator-based ASICs, static memory, MCMs and standard products provide innovative system solutions that require low power and extremely high radiation resistance.

### **ATK - Alliant Techsystems Inc. - Mission Research - Microelectronics Division**

MRC Microelectronics, a division of Mission Research Corporation, is an industry- leader in microelectronics research, engineering services, and product development of semiconductor devices for space, weapons, and harsh environments. With roots firmly entrenched in radiation effects research, the Albuquerque-based Division has diverse expertise extending from analysis and test to developing next generation, radiation hardened FPGAs, ASICs, MCMs and SOCs.

### **Xilinx, Inc. - Aerospace and Defense**

Xilinx is the leading supplier of complete programmable logic solutions for the Aerospace and Defense market. Today's high integrity applications require the density and flexibility found only in Xilinx re-programmable FPGAs.

Xilinx offers a wide range of product grades: from commercial to Mil-Temp QPro devices. The Xilinx QPro family addresses the issues that are critical to the aerospace and defense market:

QML/Best commercial practices. Commercial manufacturing strengths result in more efficient process flows.

Performance-based solutions, including cost-effective plastic packages.

Reliability of supply. Controlled mask sets and processes insure the same quality devices, every time, without variation, which remain in production for an extended time.

Off-the-shelf ASIC solutions. Standard devices readily available, no need for custom logic and gate arrays..

### **Texas Instruments - Military/Space Semiconductors**

Texas Instruments Military Semiconductor Division (CAGE Code number 01295) was created in 1978 to serve the special requirements of the Military customer. Today, we are one of the world's largest ISO 9001 certified broad-line suppliers offering products such as: Digital Signal Processors, Analog & Mixed-Signal, FIFOs, Programmable Logic, Digital Logic and products for the Military and Space industries. Process standards which we support include: MIL-PRF-38535 (QML) Class Q and V, Standard Microcircuit Drawings (SMD), MIL-STD-883, Class B compliant product, and military temperature range, commercial processed product.

### **ATK - Alliant Techsystems Inc. - Mission Research - Microelectronics Division**

### Academy Study Assesses Technical Feasibility of Space Weapons

CAMBRIDGE, Mass., May 12, 2005 - /AScribe Newswire/ - While congressional leaders and policymakers explore the possible expansion of space-based military operations, **a technical understanding of what is possible and at what cost remains unclear to many in the debate.** "A few very basic laws of physics have important implications for the way satellites, space-based weapons, and **anti-satellite weapons** can be designed and operated," write the authors of a new study from the American Academy of Arts and Sciences. In *The Physics of Space Security*, a review of the physics governing a wide variety of space operations, authors David Wright, Laura Grego and Lisbeth Gronlund explain the advantages and disadvantages of performing certain military missions in space.

The authors describe the capabilities of **anti-satellite weapons** and weapons in space and how these capabilities compare, in both effectiveness and cost, to alternative defense systems. They also consider the options open to nations that wish to defend against these capabilities, and explain the various methods for interfering with satellite systems and space-based weapons. The paper offers a clear exposition of physical laws and concepts as they apply to the deployment of weapons in space. It also includes detailed technical appendices.

As Wright, Grego, and Gronlund note, "**Unless the wider debate about these issues is grounded in an accurate understanding of the facts underlying space operations, the discussion and policy prescriptions will be irrelevant or, worse, counterproductive.**" The study provides **a foundation for the formulation of sound, science-based policy.**

*The Physics of Space Security* is one of several Occasional Papers commissioned as part of the Reconsidering the Rules of Space project, which is directed by the Academy's Committee on International Security Studies. The project seeks to convene parties with diverse interests to propose a reasonable international framework for the future of space use-commercial, scientific, and military. Forthcoming Occasional Papers will address the effects of U.S. space policy on civilian and scientific interests in space and offer international perspectives on U.S. military space plans. **The project is supported by a grant from the Carnegie Corporation of New York.** More information about the project and about the Committee on International Security Studies is available online, at <http://www.amacad.org/projects/ciss.aspx>.

**ABOUT THE ACADEMY:** Founded in 1780, the American Academy of Arts and Sciences ([www.amacad.org](http://www.amacad.org)) is an independent policy research center that conducts multidisciplinary studies of complex and emerging problems. Current Academy research focuses on: science and global security; social policy; the humanities and culture; and education. With headquarters in Cambridge, Massachusetts, the Academy's work is advanced by its 4,600 elected members, who are leaders in the academic disciplines, the arts, business and public affairs from around the world.
