THE YEAR IN REVIEW

The most important developments as described by AIAA's Technical and Program Committees

Adaptive Structures	6	Microgravity and Space Processes	61
Aeroacoustics	14	Missile Systems	62
Aerodynamic Decelerator Systems	26	Multidisciplinary Design Optimization	7
Aerodynamic Measurement Technology	15	Non-Deterministic Approaches	8
Aerospace Power Systems	50	Nuclear and Future Flight Propulsion	56
Aircraft Design	27	Plasmadynamics and Lasers	23
Aircraft Operations	28	Pressure Gain Combustion	46
Applied Aerodynamics	16	Product Support	32
Astrodynamics	17	Propellants and Combustion	57
Atmospheric and Space Environments	18	Reusable Launch Vehicles	47
Atmospheric Flight Mechanics	19	Sensor Systems	42
Balloon Systems	29	Society and Aerospace Technology	36
Communications Systems	38	Software	43
Computer Systems	39	Solid Rockets	58
Digital Avionics	40	Space Architecture	63
Economics	34	Space Automation and Robotics	64
Electric Propulsion	51	Space Colonization	65
Flight Testing	30	Spacecraft Structures	9
Fluid Dynamics	20	Space Environmental Systems	48
Gas Turbine Engines	52	Space Exploration	49
Green Engineering	44	Space Operations and Support	66
Guidance, Navigation, and Control	21	Space Systems	67
High-Speed Air Breathing Propulsion	53	Space Tethers	68
Hybrid Rockets	54	Space Transportation	69
HyTASP	45	Structural Dynamics	10
Intelligent Systems	41	Structures	11
Legal Aspects	35	Survivability	12
Life Sciences and Systems	60	Systems Engineering	37
Lighter-Than-Air Systems	31	Terrestrial Energy Systems	59
Liquid Propulsion	55	Thermophysics	24
Meshing, Visualization		V/STOL	33
and Computational Environments	22
