Mission

The British Interplanetary Society promotes the exploration and use of space for the benefit of humanity, by connecting people to create, educate and inspire, and advance knowledge in all aspects of astronautics.

Published by the British Interplanetary Society

Volume 59 No. 6 June 2017

210-213 Blue Origin: Star Trek Reality

Gerard van der Haar and Luc van den Abeelen get inside the secretive Blue Origin company and dig deep into the aspirations of founder Jeff Bezos to explain his long-term plans and new launch vehicles.

214-217 Lunar Mission One

Some 45 years after the most recent human footprints were left on the Moon, plans are under way to send robotic surveyors to the lunar surface – and a personal digital box! Founder David Irons explains.

218 Cruising the Kuiper Belt

With a breath-taking fly-by of Pluto behind them, mission planners are targeting the New Horizons spacecraft for more encounters to come as it cruises deeper into this enigmatic region of the solar system.

219-221 Revelations from Rosetta

The comet has gone and with it further operations with the Rosetta spacecraft and the Philae lander but scientists are getting to grips with a fascinating story of change on the surface of a transient visitor.

222-223 TRAPPIST-1: Destination or Deceiver?

The recent announcement that there is a family of planets around the star TRAPPIST-1 sent speculation soaring that a mini solar system might harbour life. But all is not as it might at first seem.

224 Expeditions to the Outer Planets

Interest is growing in the role played by Uranus and Neptune as the dramatic part they played in organising the structure of our solar system becomes clearer, with some scientists calling for new missions.

225 Gateways to Mars?

NASA has an objective to send humans to Mars, but no plan. Commercial launch providers have a plan to provide rockets which could do that without taxpayer's dollars. Do we just need to get the two together?

226 The Next Voyage of Columbia

Dwayne Day brings us up to date with restoration work on the Apollo 11 Command Module and gives a foretaste of a celebratory tour to come.

228 "Scooter" on stage

Rick Mulheirn was with astronaut Scott Altman on his recent visit to the UK and with him and his wife to reflect on a glittering career.

Regular Features

204-206 News Analysis – Space access from UK

206 A Letter from the Editor

207-209 ISS Report – 9 March - 8 April 2017

229 Flashback – A regular feature looking back 50 years ago this month

230-231 Correspondence – No place in Space – Little Green Men – A clerical view – Flawed? - Backlash

232-233 Satellite Digest – 533 March 2017

235-236 Society News – Cosford - Another success – Anna Smith visits the BIS

238 What's On

Cover image: *The discovery of seven potentially habitable planets around TRAPPIST-1 has led to speculation about the possibilities for life (see pages 222-223).* NASA
