Mission

The British Interplanetary Society promotes the exploration and use of space for the benefit of humanity, by connecting people to create, educate and inspire, and advance knowledge in all aspects of astronautics.

Published by the British Interplanetary Society**Volume 59 No. 10 October 2017****371 A Target for Icarus**

Peter Milne continues his occasional series on the Icarus interstellar project with a description of the evolving work to find a suitable destination for the spacecraft, finding several options but only one preferred target.

**372-376 "Houston, this is Honeysuckle..."**

A veteran of more space missions than most people can remember, Hamish Lindsay describes the vital role played by Australia's tracking stations during manned and unmanned flights, including personal memories of the Honeysuckle Creek facility.

**377-379 New Horizons for Space Modellers**

Spaceflight asked Tony Radosevic to describe the motivation behind his new range of model kits depicting early launch vehicles, ICBMs and spacecraft and to tell us what he envisaged for the future of his company in Australia.

**380-383 Cassini - The Grand Finale 1: Steps onto the stage**

A historic mission is coming to an end and, in the first of a three-part series, *Spaceflight* looks back 20 years to the origins and extraordinary accomplishments of the Cassini-Huygens spacecraft, a triumph for international cooperation.

**384-387 Visions of Space Revisited**

Chris Starr played a major role in gathering together a stellar range of space art and speakers at Wells Museum during June and presents just some of the remarkable range of subjects and talent on display.
