

Table of Contents

Foreword	v
Executive Summary	vii
List of Figures	xxi
List of Tables	xxi
List of Acronyms and Abbreviations	xxiii
Chapter 1: Introduction	1
1.1 Study Tasking.....	1
1.2 Organization and Methodology.....	2
1.3 Study Time Frames.....	3
Chapter 2: A Vision of 21st Century Aerospace Power	5
2.1 The Challenge of <i>Joint Vision 2010</i>	5
2.2 Real-World Constraints.....	9
2.3 Operations in Space.....	9
2.4 Integrating Air and Space.....	10
2.5 Assessing Operational Effectiveness.....	12
2.6 Elements of a Vision.....	15
Chapter 3: Force Structure Findings and Recommendations	17
3.1 Move to a Network-Centric, Global Grid Information Structure.....	17
3.2 Develop a Global, All-Condition, Intelligence/Surveillance/Reconnaissance Capability.....	19
3.3 Provide Robust Position, Navigation, and Timing.....	21
3.4 Prepare for Global Energy Projection.....	22
3.5 Improve Space Surveillance and Develop a Recognized Space Picture Construct for the Common Operating Picture.....	24
3.6 Protect U.S. Space Assets Against Likely Threats.....	25
3.7 Develop a Space Test Activity and Adequate Modeling, Simulation, and Analysis Tools.....	26
3.8 Preserve the Option to Develop an Aerospace Operations Vehicle.....	26
3.9 Space Control.....	28
3.10 Transition National Launch Facilities to Civilian Operations With the Air Force as a Tenant.....	28
3.11 Transition Launch to Primary Reliance on Commercial Services.....	29
3.12 Implement Commercial Models and Other Improvements to Satellite Operations and Tracking.....	30
3.13 Summary.....	31
Chapter 4: Affordability Analysis	33
4.1 Affordability Analysis Methodology.....	33
4.2 A Look at the Budget.....	34
4.3 Required Actions.....	38

Chapter 5: Related Findings and Recommendations	39
5.1 Create an Air Staff Concept Development Process and Central Aerospace Architecture Function.....	39
5.2 Develop and Implement Aerospace Power Doctrine and Strategy.....	40
5.3 Improve Acquisition Practices	41
5.4 Use Commercial Space Wisely	42
5.5 Focus the Technology Base on Military-Unique Technologies	44
5.6 Improve Human Factors in Space System Development and Operations	47
Chapter 6: A Space Roadmap and Strategy	49
6.1 An Integrated Program for the Aerospace Force.....	49
6.2 Relationship of the Study to Other Air Force Initiatives	51
6.3 Study Summary	51
Appendix A: Terms of Reference	A-1
Appendix B: Study Organization	B-1
Appendix C: Panel Report Abstracts	C-1
Appendix D: Initial Distribution	D-1

List of Figures

Figure ES-1. <i>The Challenge Facing Aerospace Forces in the 21st Century Is to Develop and Apply Core Competencies That Effectively Implement National Military Policy</i>	ix
Figure ES-2. <i>Rapid, Precise, Global Strike Capability Illustrates the Potential of Aerospace Forces to Contribute in New Ways to Achieving National Objectives</i>	ix
Figure ES-3. <i>Integrated Aerospace Power Is an Essential Element of Joint and Coalition Warfare</i>	x
Figure 1-1. <i>Overall Study Flow</i>	3
Figure 2-1. <i>An Integrated, Knowledge-Rich Aerospace Force Is a Key Element of Joint Vision 2010</i>	8
Figure 2-2. <i>The Rapid Growth of Commercial Space Makes It Increasingly an Economic Center of Gravity</i>	10
Figure 2-3. <i>Operational Architecture Addresses the Interactions Among Elements of a Force</i>	11
Figure 2-4. <i>Our Vision Is Based on an Integrated Force Able to Deal Efficiently With the Full Range of Taskings</i>	15
Figure 3-1. <i>A Diverse, Redundant, High-Capacity Network Provides the Essential Connectivity to the Joint Warfighting Force</i>	18
Figure 3-2. <i>A New SBR Cooperates With ISR Aircraft and Ground C⁴I Nodes to Enhance Situational Awareness</i>	20
Figure 3-3. <i>A Number of System Concepts Have Been Proposed for Energy Projection Through Space</i>	22
Figure 3-4. <i>Deteriorating Facilities and an Increasingly Commercial Launch Schedule Create a Serious Air Force Burden</i>	28
Figure 4-1. <i>Achieving an Executable Program Requires a Balance Between New Spending and Savings From Ongoing Activities</i>	33
Figure 4-2. <i>Current Total Air Force Budget Profile</i>	34
Figure 4-3. <i>Breakout of the Baseline Space Program by Functional Areas</i>	35
Figure 4-4. <i>Baseline Less Conservative Savings Estimate</i>	36
Figure 4-5. <i>Impact of Worst-Case New Program Funding After Conservative Savings</i>	36
Figure 4-6. <i>Realizing Our Aggressive Savings Estimates Brings the Enhanced Program Back Into Balance With the Original Baseline</i>	37
Figure 6-1. <i>Consolidated Roadmap Based on the Study's Recommendations</i>	50

List of Tables

Table 2-1. <i>Examples of Space Contributions to JV2010 Operational Concepts</i>	5
Table 2-2. <i>Summary of Baseline and Recommended Force Structures</i>	13
Table 2-3. <i>Examples of Shortfalls of the Baseline Force and Improvements From the Recommended Option vs. JV2010 Operational Concepts</i>	14
Table 5-1. <i>Categories of Purchases</i>	43
Table 5-2. <i>Examples of Areas Where the Air Force Technology Base Should Be Focused</i>	46
Table 6-1. <i>Relevance of This Study to Ongoing Initiatives Addressing the Future of the Air Force</i>	52
